

Student Result Management System

Project Overview

The **Student Result Management System** is a simple Python-based project designed to calculate and display a student's academic result.

The project takes student details and marks of three subjects as input. It calculates the total marks, percentage, grade, and final pass/fail result.

This project is created using basic Python concepts such as variables, input/output, arithmetic operations, conditional statements, and logical operators.

Features

- Enter student name
- Enter roll number
- Enter branch
- Enter marks for three subjects
- Calculate total marks
- Calculate percentage
- Calculate grade
- Check pass/fail result
- Display the complete student result

Technologies Used

- Python 3
- Visual Studio Code / IDLE
- GitHub

Passing Criteria

Each subject has a maximum of **50 marks**.

A student must score at least **20 marks in each subject** to pass.

Grade Criteria

Percentage	Grade
-------------------	--------------

90% and above	A+
---------------	----

80% - 89%	A
-----------	---

70% - 79%	B
-----------	---

60% - 69%	C
-----------	---

50% - 59%	D
-----------	---

Below 50%	F
-----------	---

How to Run

Step 1

Install Python 3 on your computer.

Step 2

Open the project folder in Visual Studio Code or another Python editor.

Step 3

Open the main program:

code5_main_project.py

Step 4

Run the program.

Step 5

Enter the student details and marks when requested.

Sample Input

Enter student name: Keshav

Enter roll number: 101

Enter branch: Bioengineering

Enter marks out of 50

Enter marks of Subject 1: 42

Enter marks of Subject 2: 38

Enter marks of Subject 3: 45

Sample Output

=====

STUDENT RESULT

=====

Name : Keshav

Roll Number: 101

Branch : Bioengineering

Total Marks: 125 / 150

Percentage : 83.33 %

Grade : A

Result : PASS

=====

Concepts Used

The project demonstrates the following Python concepts:

1. Variables
2. User input
3. Data types
4. Arithmetic operators
5. Conditional statements
6. If-elif-else

7. Logical operators
8. Formatted output

Future Scope

The project can be improved in the future by adding:

- Multiple student records
- File handling
- Database storage
- Student search facility
- Student result editing
- Graphical User Interface (GUI)
- Automatic report generation
